DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 19 and 20, drawn to a surface mount production system, classified in class29, subclass 791.
 - II. Claims 21-29, drawn to a system for use within a surface mount production line having a conveyor, classified in class 29, subclass 709.
 - III. Claims 35-38, drawn to a system for programming and assembling programmable device on printed circuit board, classified in class 29, subclass 729.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as applying solder paste on the printed circuit board, invention Group II has separate utility such as directing the conveyor to move the printed circuit board by the central control unit, and invention groups III has separate utility such as computing the location and orientation to place device on printed circuit board using recognition techniques. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/770,913 Page 3

Art Unit: 3729

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III and vice versa, restriction for examination purposes as indicated is proper.

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Gerald T. Gray on July 30, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donghai D. Nguyen whose telephone number is (703) 305-7859. The examiner can normally be reached on Monday-Friday (9:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter D. Vo can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
